

Teignbridge District Council

District Public Health Summary 2015-16

Public Health Annual Report 2014-15 Priorities for the health of people in Devon

- 1. Continuing to reduce health inequality across Devon, ensuring that the needs of our most vulnerable or unhealthy populations are being met, and that health care commissioners are able to evidence this.
- 2. Improving levels of physical activity and the proportion of people at a healthy weight, and promoting the Mediterranean diet to improve health.
- 3. Reducing excessive, harmful alcohol consumption.
- 4. Reducing the proportion of people in Devon who still smoke, particularly pregnant women, and preventing young people from starting smoking.
- 5. Ensuring all children have the best possible start in life and supporting families to do this.
- 6. Improving mental health and emotional wellbeing, particularly in children and young people.
- 7. Working to prevent domestic and sexual violence and abuse, and the sexual exploitation of children and young people.
- 8. Detecting and preventing the onset of chronic (long term) health conditions and reducing their severity during older age.
- 9. Increasing the early detection, and treatment of, cancer.
- 10. Increasing social connectivity in communities to reduce social isolation and loneliness, and increasing the opportunities we have to improve our own health and wellbeing.

The proportion of people aged 85 years or more in Bishops Teignton is 7.13% compared with the English average of 2.3%.

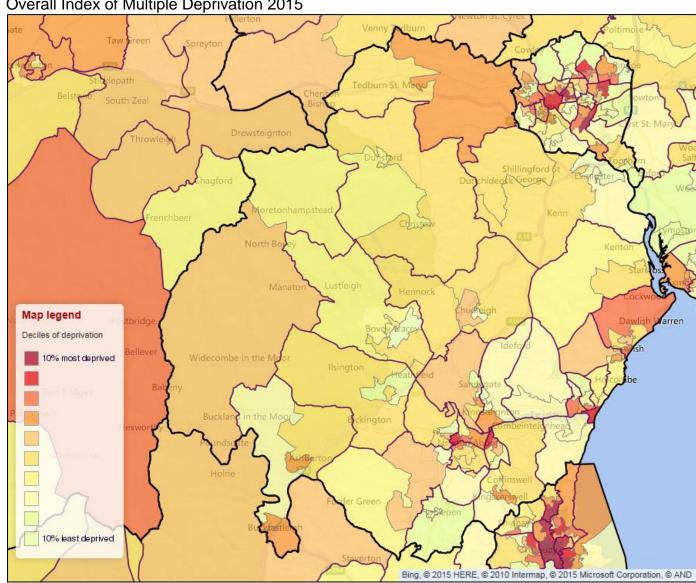

Deprivation

Overall Index of Multiple Deprivation 2015

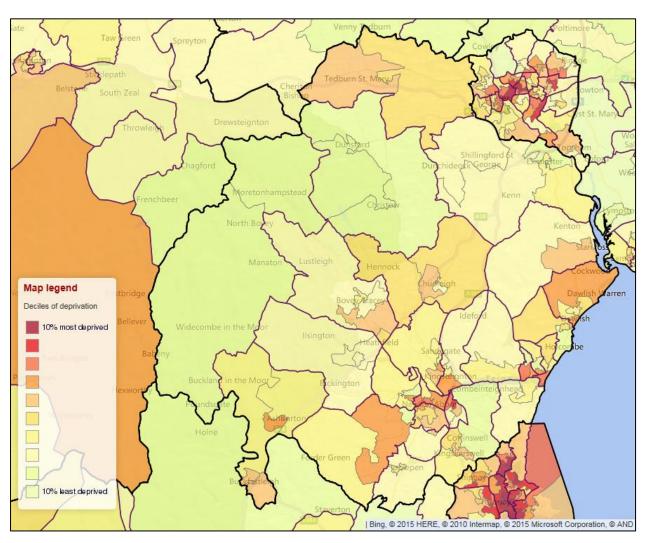

Page | 10

Health deprivation domain

The Health Deprivation and Disability Domain measures the risk of premature death and the impairment of quality of life through poor physical or mental health. The domain measures morbidity, disability and premature mortality but not aspects of behaviour or environment that may be predictive of future health deprivation.

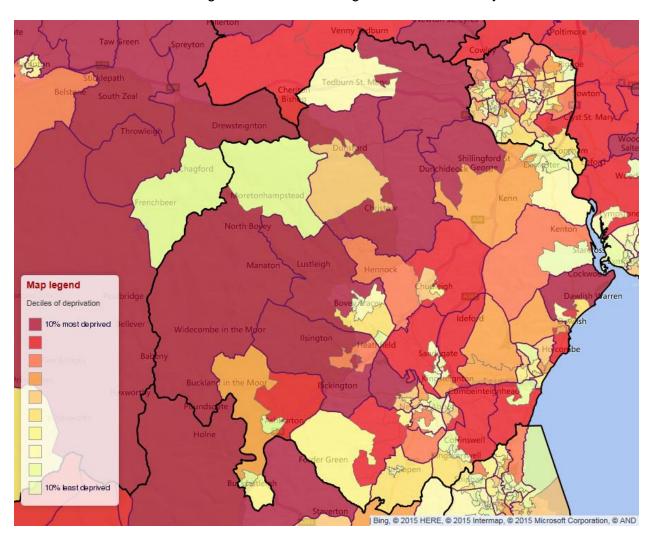

Page | 11

Barriers to housing and services domain

The Barriers to Housing and Services Domain measures the physical and financial accessibility of housing and local services. The indicators fall into two sub-domains: 'geographical barriers', which relate to the physical proximity of local services, and 'wider barriers' which includes issues relating to access to housing such as affordability and homelessness.

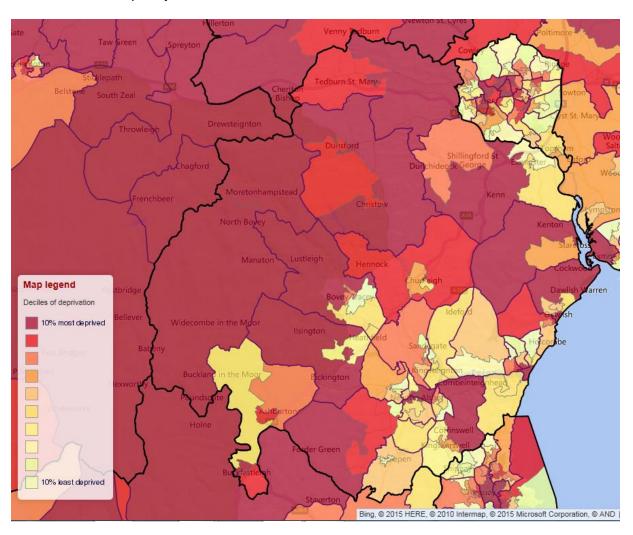

Living environment deprivation domain

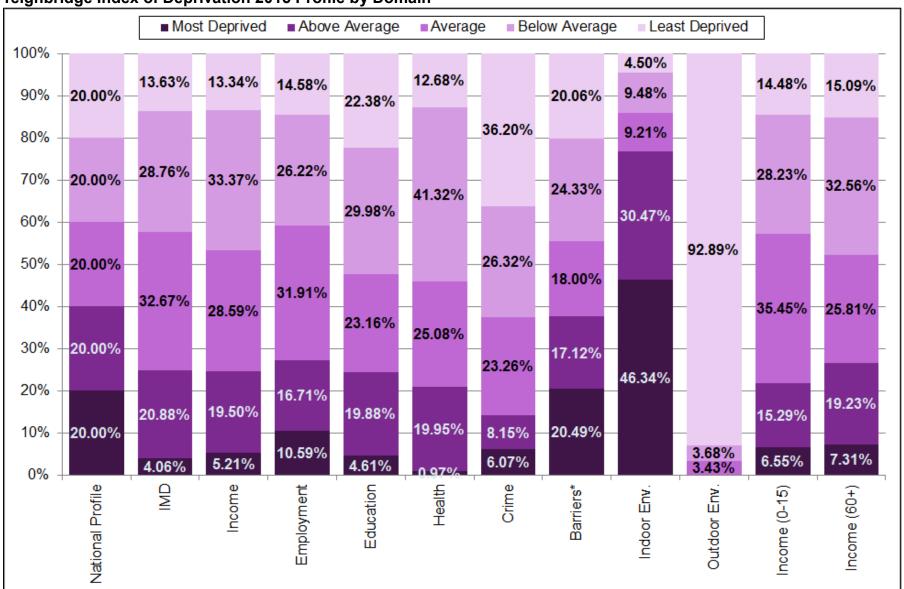

The Living Environment Deprivation Domain measures the quality of the local environment. The indicators fall into two subdomains. The 'indoors' living environment measures the quality of housing; while the 'outdoors' living environment contains measures of air quality and road traffic accidents.

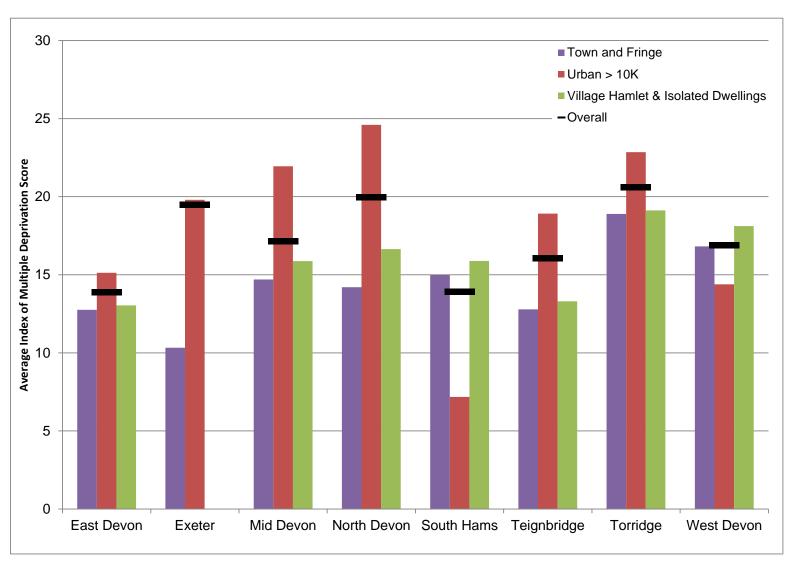

Teignbridge Index of Deprivation 2015 Profile by Domain

Urban / Rural Deprivation Charts

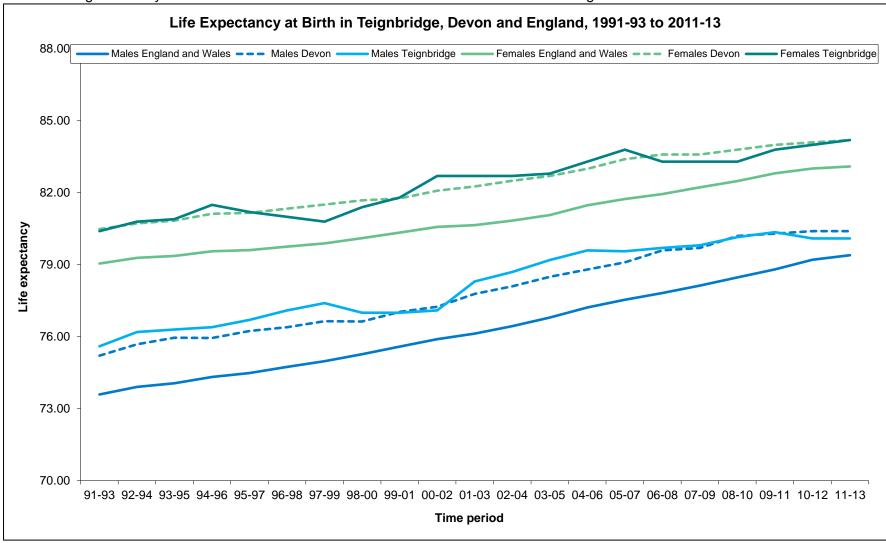

Life Expectancy

The average life expectancy for the female population of the Teignbridge is 84.2 years and 80.1 for the male population. This is similar to the Devon average of 84.2 years for females and 80.4 for males and above the national average of 83.1 for females and 79.4 for males.

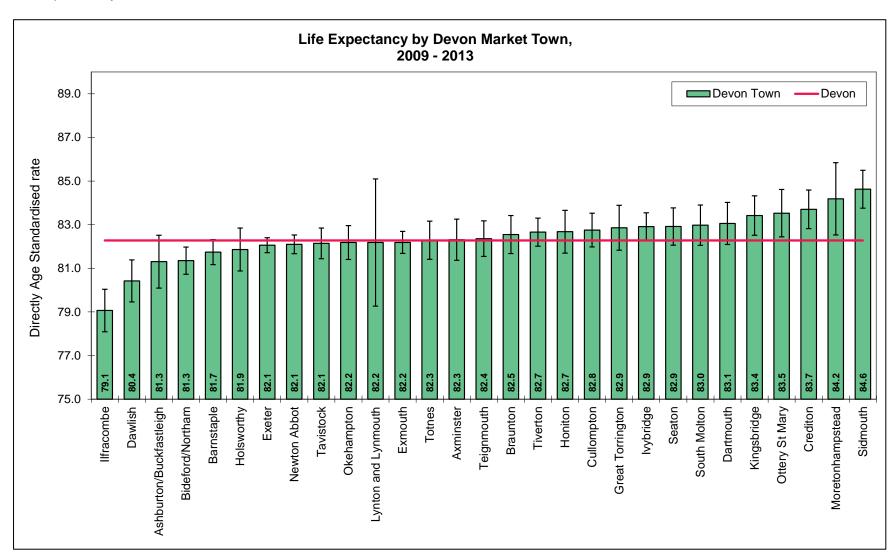

Source: Office of National Statistics

Life expectancy in Newton Abbot and Teignbridge are not statistically significantly different to the Devon average. Moretonhampstead has a statistically significantly higher life expectancy to Devon and Dawlish has a statistically significantly lower life expectancy to Devon.

Projections of Health and Social Care Conditions

Domestic Abuse and Sexual Violence Factsheet

An estimated 8.5% women and 4.5% of men have been a victim of domestic abuse past 12 months (Source: Crime Survey for England and Wales 2013/14: Chapter 4: Violent Crime and Sexual Offences - Intimate Personal Violence and Serious Sexual Assault).

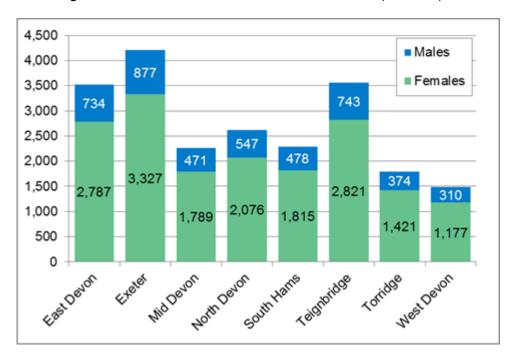

- An estimated 2.2% women and 0.7% of men experienced sexual assaults (including attempts) in the past 12 months (Source: Crime Survey for England and Wales 2013/14: Chapter 4: Violent Crime and Sexual Offences - Intimate Personal Violence and Serious Sexual Assault).
- Domestic abuse and sexual violence can affect anyone, though those from certain groups including younger people (under 25), women, LGBT, those with physical disabilities and mental health needs, and people from BME groups are all at higher risk of experiencing violence and abuse.
- Perpetrators of abuse and violence come from all sectors and parts of society
- Patterns of abuse at home are often repeated in successive relationships and across generations.
- Over 90% of victims of sexual violence know the perpetrator. Locally 33% of rape crisis clients have ongoing contact with the perpetrator.
- The costs of domestic violence and sexual abuse are extensive to the public purse. In Devon, Home Office research estimates that domestic violence costs the statutory agencies over £70 million^[1].
- Domestic abuse can have a profound effect on the whole family. Children are present at 36% of incidents reported to the police in Devon (2013/14).
- Experiencing abuse causes or exacerbates a wide range of other vulnerabilities and needs. Of adult victims using Devon's domestic violence services in 2014-15:
 - 38% reported Mental Health Issues
 - 21% reported Suicide Attempts and Self-harm
 - Substance Misuse (9% reported alcohol abuse and 6% drug abuse)
 - 30% experienced Financial Problems
 - Many experienced homelessness and housing issues
 - Parenting Problems were common (40% of their children were had social services involvement)
